----------Welcome to----------

---Library Management System-------

Built by:

1. **Nirmal Subedi**
2. **Asim Bhattarai**
3. **Krishna Subedi**

Begin Loop: (allow 10 attempts)
{
Ask for Pin:
Enter Login Pin: _____ (4 digits)
if (Input != Correct Pin)
{
=>Display "Contact Admin & Try Again"

Display:
Opt. 1) Input Pin

=> continue; (loop repeats directly)
Opt. 2) End();
=> program terminates !
}
else
{
=>Display "login successful"
=>Open "Dashboard Page"
}
}
End(); (pgm terminates after 10th attempts)

Page 2.0.0

----------Dashboard ----------

| ----------TOTAL BOOKS = x no. ----------|
| --------BOOKS IN STOCK = x-y no. ------|
| ---------BOOKS ISSUED = y no. ----------|

----------Menu----------

Display:
Opt. 1) Open Book Details
Opt. 2) Add New Books Details
Opt. 3) Delete or Reduce Books
Opt. 4) Return of Book
Opt. 5) Issue of Book
Opt. 6) Log Out of all

Page 2.1.0

-----Open Book Details-----

Display
Opt. 1) Books of "BIT"
Opt. 2) Open "Dashboard page" 2.0.0
//Note: Only 1 faculty is for simplicity of this project

Page 2.1.1

-----Table of The "Books Of BIT" in Library-----

Cat. I.D	Book Name	Author	Total Books Count	Issued Books
1	Math 1	Dr Ab	6	2

Cat. I.D	Book Name	Author	Total Books Count	Issued Books
2	Math 2	Dr Cd	8	3
3	Let us C	Dr Ef	9	4
4	Let us C++	Dr Gh	10	5

press "Enter" to open "Open Book Details Page"

Page 2.2.0

-----Add New Books Details-----

Display:
Opt. 1) Add Books of "BIT"
Opt. 2) Open "Dashboard page" 2.0.0
Opt. 3) Open "Open Book Details page" 2.1.0

Page 2.2.1

Opt. 1) Open "Delete or Reduce Books Page" 2.3.0
Opt. 2) Open "Present book details Page" 2.1.0
Opt. 3) Open "Dashboard Page" 2.0.0

Page 2.4.0

---------Return of Book----------

Ask to Enter: "Student ID"
=> take ID input e.g. 012321

=>Display Name & Show Books taken by the student
(Do it auto from files and functions)

----Books Issued to the Student XYZ----

Book ID	Book Name	Author	Issue Date
1	Math 1	Dr Ab	20260506

Book ID	Book Name	Author	Issue Date
2	Math 2	Dr Ef	20260509

Display option for:
Opt. 1) Return Books of this Student
Begin loop:
{
=> Display: "Enter Book Unique ID to return now"
=> Take input (eg.123456) written in book's front

If (Returning Book ID no == Issue Book Unique ID)
{
=>Display: " ID Matched & Returning successful"
(Yet, do it auto from files and functions)
}
else
{
=>Display: "Book ID Do not match with issued one"
}

Give Nested Choice to user to:
Opt. 1) Do it again for different or same (i.e. continue)
Opt. 2) Done for This ID now (i.e. break out of the loop)
} //**loop closes**

(option 1 was to return book of a student using student ID)
Opt. 2) Now for Next Student (re-open for next stu. ID) 2.4.0
Opt. 3) Open "Dashboard Page"

Page 2.5.0

----------Issue of Book----------

Ask to Enter: "Student ID"
=> take ID input e.g. 012321

=>Display Name & Show Books taken by the student
(Do it auto from files and functions)

----Books Issued to the Student XYZ----

Book ID	Book Name	Author	Issue Date
1	Math 1	Dr Ab	20260506

Book ID	Book Name	Author	Issue Date
2	Math 2	Dr Ef	20260509

Display option for:
Opt. 1) Issue Books to this Student

Begin loop:
{
=> Display: "Enter Book Unique ID to return now"
=> Take input (eg.123456) written in book's front

If (New Issuing Book's Cat ID == Existing Issued Book Cat. ID)
{
=>Display "Same Book taken already"
(Note: This Option can be removed if program gets
more complex & allow easy Issuing of Book)
(Yet, do it auto from files and functions)
}
else
{
=>Display "Issued & Recorded Successfully "
}

Give Nested Choice to user to:
Opt. 1) Do it again for different or same (i.e. continue)
Opt. 2) Done for This ID now (i.e. break out of the loop)
} //**loop closes**
Opt. 2) Now for Next Student (re-open for next stu. ID) 2.5.0
Opt. 3) Open "Dashboard Page"

Note:

1. Students Details i.e. Name, ID Will be pre recorded in the database (text file in case of C) for this program
2. Student Name ID cannot be changed or deleted from console.
3. Books Issued to & returned by students can be changed,
4. Only the Records of Book can be Newly added &/or Wiped entirely from front end (console of C).
5. We are trying to give it the shape of software as far as possible.
